stroke (identity-LD)	0 (identity)	converged	FALSE	12
stroke (real-LD)	0.9811	non_converged	FALSE	100
t2d (identity-LD)	0 (identity)	converged	FALSE	3
t2d (real-LD)	0.2580	converged	FALSE	33

Figure 3. Structural collapse of identity-LD signal at SH2B3 12q24 EUR under realLD re-analysis.
Top-left panel: per-trait SuSIE-RSS credible-set yield at SH2B3_12q24 EUR under identity-LD fallback (gray, leftward) vs real 1000G Phase 3 EUR LD (blue, rightward).
Top-right panel: locked PP.H4 narrative numbers from .planning/amendments/TRACK-A-FROZEN-NUMBERS.md (Stage 2 production fire 2026-04-22). PP.H4 95% confi
Bottom panel: per-fit data-quality disclosure surfacing ld_overlap_fraction + susie_status + L_saturated for each of the 5 EUR traits x 2 LD branches (10 rows). ld_overl
